TOKEN

The New Outstanding Early Gladiolus

Please note that in the presentation of complete description of TOKEN—that same is based only on actual proven facts.

COLOR—Attractive flaming salmon with golden yellow throat.

This is a gladiolus full of color expression.

SIZE.—Flowers measure full 4½ inches across.

LENGTH OF FLOWER STEM.—The length of flower stem of Token when grown outdoors is about 58 inches—when grown in the greenhouse it is about 64 inches.

LENGTH OF FLOWER HEAD.—Token carries a good flower head, with length of 24 inches.

NUMBER OF BUDS.—Token grown outdoors have 16 to 18 buds, and when grown in the greenhouse, we have not seen any change in that amount.

NUMBER OF FLOWERS OPEN.—Token is a Gladiolus to fully appreciate its beauty is to see the flowers open. It opens 5 to 6, while the remaining buds show color. The flowers are inclined to be slightly ruffled at the edges, making this a real beautiful flower.

PLACEMENT.—Token's placement is a real asset. It is ideal, similar to Picardy.

STEM.—Token is a straight grower, on a wiry stem.

NUMBER OF DAYS TO FLOWER.—Token is the real exceptional early Gladiolus.

Outdoors it blooms in about 69 days. Greenhouse it blooms in about 85 days.

SHIPPER.—Token is a very good shipper. Altho a large flowering Gladiolus—early—due to the fact it has a wiry stem; it is not heavy, thus cutting down shipping weight cost, producing a desirable cut flower.

FORCER.—Token as a forcing Gladiolus has proven its merits. A real early Gladiolus, flowering at the time of good market prices.

PROPAGATION.—Token is a good grower, producing an abundance of good size bulblets. Bulblets germinate easily, growing into good size bulbs the first season.

BULB SALES ITEM.—Token produces clean stock, of excellent appearance bulbs. Nice, clean high grown bulbs, that makes TOKEN—a good sales item.

WARM WEATHER GLADIOLUS.—Token has been grown in the south—and all reports on same have been indeed good. Tips of flowers do not burn—and has shown also that it is a good warm weather Gladiolus.

Token does not conflict with Picardy
as it is three weeks earlier.
